Magnet Field Indicator

PART NO: WATMT702

FEATURES:

- Easy to use non–metallic sensor tests for the presence of magnetic fields
- Responds to all kinds of magnetic fields, such as alternating current, direct current and permanent magnets
- Easy to use
- For testing solenoid valves in pneumatic and hydraulic control equipment
- Tip glows red when magnet field is detected
- Also tests relays with coils and electrically controlled solenoid valves
- Test magnet included in cap

TECHNICAL DATA:

Sensitivity	300 gauss (0.3mT)
Functional check	Test magnet included
Power supply	2 standard AAA batteries (included)
Category rating	CAT III 1000V AC
Material	Pa6, PP–COP
Dimensions	152 x 17mm
Weight	40g
